DRAINAGE CATHETER SET

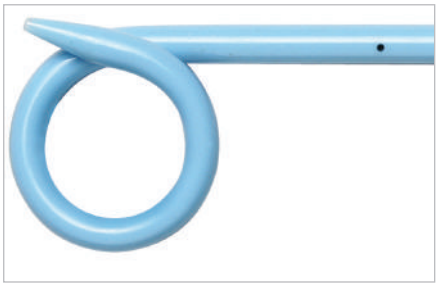
DRAINAGE CATHETER SET-DIRECT ACCESS



- Used for nephrostomy, abscess, and other multipurpose drainage.
- Catheter placement is performed using one step (direct access) technique.
- The safety string lock system provides strong fixation of the pigtail.
- Hydrophilic decreased friction of the distal catheter facilitates easy insertion.
- Large oval drainage holes increase drainage capability.
- Supplied sterile in peel-open packages.
- Intended for one-time use.

DRAINAGE CATHETER SET-DIRECT ACCESS

- Loop size is smaller than regular pigtail type.
- Used for the early stage of nephrostomy, abscess, and other multipurpose drainage.
- Catheter placement is performed using one step (direct access) technique.
- The safety string lock system provides strong fixation of the pigtail.
- Hydrophilic coating decreased friction of the distal catheter facilitates easy insertion.
- Large oval drainage holes increase drainage capability.
- Supplied sterile in peel-open packages and for one time use.

DRAINAGE CATHETER SET-SELDINGER

- Used for nephrostomy, abscess, and other multipurpose drainage.
- Catheter placement is performed using Seldinger technique.
- The safety string lock system provides strong fixation of the pigtail.
- Hydrophilic coating decreased friction of the distal catheter facilitates easy insertion.
- Large oval drainage holes increase drainage capability.
- Radiopaque band aids in proper placement of the catheter.
- Supplied sterile in peel-open packages.
